Elizabeth Gregory Home

Elizabeth Gregory Home helps women who experience homelessness or have trouble affording food and shelter. Women can come to EGH to use our showers, eat a meal, or get help finding jobs or homes. For many of these women, EGH is one of the only places they can rest and feel safe.

At EGH, we believe that all people need community and friendships, and we include all different kinds of women. We even have an art program, where women can paint or make crafts to help relax, have fun, and build confidence.

Something that makes EGH special is how we believe people should be treated. At EGH, all of our guests are treated with respect and kindness. When people are going through hard times, kind words can help them remember that they matter, just for being themselves. They feel encouraged to keep going, no matter how hard things are.

Here are some specific ways that EGH helps people:

- Women can pick out clothing from items that people have donated
- Women can use EGH's address to get mail. We also have computers that they can use to access email or find things on the internet.
- Women can rest in our very popular recliners. It can be hard to sleep in shelters or on the street, so our guests are often tired and need a safe place to relax.
- Our employees cook meals just for our guests and can also pack them snacks or food to take with them. A home-cooked meal is something special that some of the women don't get often. We served nearly 18,000 meals in 2024!
- Our employees can help women find houses or apartments that might be available for them. In 2024, we helped 48 women find temporary shelter, and 18 women find permanent homes. Some of the women don't have IDs or birth certificates, which are really important for getting a job or a house, so EGH can help them get those, too.
- Women can use our showers and also do laundry while they're at EGH.
- Sometimes doctors, dentists, or nurses will come to EGH to help people, too. We also have a counselor who helps people with their mental health.

We see more than 30 women each day. Some come every day we are open, and some might only come once. In 2024, 564 different women came to visit us, and more than 250 of them visited us for the first time!
